1 Brändi grill complete (consisting of four individual components)

- Cooking grill
- Grill retaining bracket
- Grill bar (top part)
- Grill bar (bottom part)

- 1 bag for grill
- 1 set of online instructions

Dimensions

380 x 225 mm

(packed in the bag)

Weight approx. 850 gr.

Product information

The Brändi Grill is a Swiss quality product and the ideal companion for bikers and hikers. This original product made from corrosion free stainless steel was developed by the Brändi foundation which has been a trusted barbecue brand for many years.

The grill can be completely dismantled, pivoted and the height and depth can be adjusted to any level. It can be transported conveniently and compactly.

The cooking grill and retaining bracket are made from chrome-nickel steel (CrNi 18-10) and the two part grill bar is made from aluminium. All parts can also be ordered separately.

The Brändi Grill comes with a 5 year guarantee.

Additional information

Aluminium is lightweight and a good conductor of heat. It may be subject to deformation if heated to above 250° C. Therefore, the grill bar should not be placed in the middle of the embers. As the heat is largely conducted into the ground using a square tool (slider), the handle does not become hot. Pushing the bar into hard surfaces should be avoided as this could lead to damage. It is recommended that the grill bar should only be pushed into the ground once the fire has died down, so that barbecuing can begin.

Constructing

The grill bar consisting of a top and bottom part, is screwed together.

The grill bar is carefully pushed into the ground beside the fire area.

The retaining bracket and cooking grill are mounted to the grill bar (leverage effect).

Tips and tricks

The bars on the grill can be cleaned using the new cleaning groove on the handle.

In order to extend the service life of the grill bar, the external thread of the bar can be lubricated before screwing together (the grease from grilled food can also be used).

In order to clean the grill bar, place it in the embers and then quench in cold water using the handle.

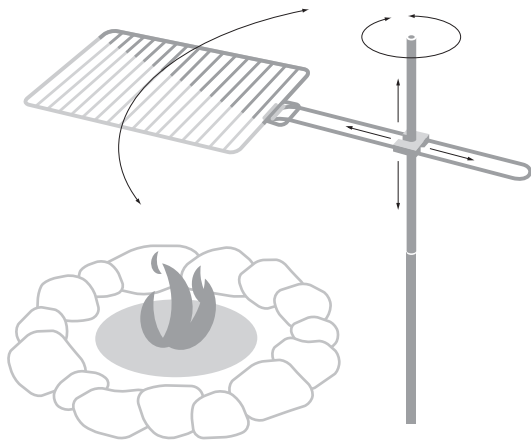

Optimale Verstell-Möglichkeiten des Brändi Grill garantieren überall und jederzeit die beste Grillposition.
